

VOIPLINK

a **SCOTEL** company

PROVISIONING SERVICES

Configuring a new phone properly can mean the difference between a satisfied customer and a missed opportunity for a great referral. Fortunately, Voiplink's provisioning staff has the knowledge and expertise to ensure your customer's new endpoint functions correctly from the moment it connects to their system.

IP Phone Provisioning

- Loading base configuration that may include:
 - FTB/TFTP Settings.
 - DHCP Settings.
- MAC Addresses & Serial Numbers Recorded.
- Configured and functionally tested prior to deployment.
- Box labeled with MAC address, name, serial number, location and extension to ensure delivery of right phone to right place.
- Shipped for Plug & Play use at customer site.

From a few to a few thousand, Voiplink can handle the configuration (and logistics) and let you focus on what you do best. To discuss how we can customize a solution that fits your needs, call **866-987-8647** or email info@voiplink.com
